DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 4, and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Ploovy (U.S. Patent No. 4,921,510). Ploovy teaches an ashtray comprising a container, a bag that is present within said container (Figure 1), and an air eliminator that communicates with a space that is between said bag and said container (column 3, lines 29-34), wherein said bag is attached to said container so that said space is substantially air tight (column 3, lines 41-44). Accordingly, claim 1 is rejected.

Regarding claim 3, Ploovy teaches that said air eliminator communicates with a space that is between said lower portion of said bag and said container (column 3, lines 29-34). Accordingly, claim 3 is rejected.

Regarding claim 4, Ploovy teaches that an upper portion of said container supporting said bag is funnel shaped (Figure 1). Accordingly, claim 4 is rejected.

Regarding claim 9, Ploovy teaches the air eliminator is a vacuum pump (column 4, lines 32-38). Accordingly, claim 9 is rejected.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Application/Control Number: 10/602,811

Art Unit: 1731

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ploovy as applied to claim 1 above, and further in view of Thomas et al (U.S. Patent No. 3,840,204). Ploovy teaches an apparatus that uses a plastic bag (column 3, lines 25-29). Ploovy fails to teach a bag that is flame-retardant. However, Thomas teaches that ashtrays, particularly the portions holding the ashes (i.e. the cup member 38 in the Thomas teaching), are preferably made of a plastic material, which is heat resistant, and fire proof. It would have been obvious to one of ordinary skill in the art at the time of the invention to use a bag that is flam retardant or heat resist and fire proof to hold the ashes contained in the ashtray so that the ashes will not melt the bag thereby making the ashtray less effective. Accordingly, claim 6 is rejected.

Allowable Subject Matter

Claims 2, 5, 7, 8, 10, 11 and 12 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the prior art teaches ashtrays or other container capable of holding ashes that are lined with some type of liner or bag. The prior art also teaches containers with evacuation devices or vacuums to evacuate or depressurize the area between the container and the liner or bag. However, the prior art fails to teach a container with an evacuation device that also has a closure mechanism that selectively applies pressure to the bag to separate an upper portion of said bag from a lower portion of said bag. The instant invention teaches this novelty.
